

Fullstack software engineer

# Milad <sup>z</sup> Xandi

website

## Self Introduction

Full-stack developer with 10+ years of experience in PHP, C#, and JavaScript, specializing in Laravel, Nuxt.js, .NET MAUI, and Unity3D. Passionate about mentoring developers and leading technical teams from concept to delivery.

## Experience (Only last recent jobs)

### Senior Full Stack Developer | Ayar+ | January 2026 - Present

Joined as the sole full-stack engineer and built every service from the ground up. The codebase I delivered now supports a team of 6 full-time developers.

1. Cross-platform accounting app for jewelry stores (Android, iOS, macOS & Windows) built with .NET MAUI
2. Kuwaiti RFID national card reader & data extraction service built on .NET Framework 4.8.1
3. Web-based online accounting platform for jewelry stores built with Laravel & Vue.js
4. Real-time gold price extraction service built with Go

### Senior Full Stack Developer | Alvan Market | January 2026 - Present (part-time)

Working on two projects in two separate phases of development:

1. Web full-stack development of an e-commerce website based on Laravel framework & Nuxt.js with MySQL deep & fast queries
2. MAUI.NET (Android, iOS & Windows) apps for vendors
3. Fast, scalable & production-ready recommendation project based on Go

### TechLead | SLVR Game Project | March 2024 - January 2026

Working on two projects in two separate phases of development:

1. Working on a Unity3D project with a Laravel base back-end which is published for VR (Meta Quest), Android & iOS
2. Working on a semi-realistic Unreal Engine 3D project with a self-written web framework based on the C++ language named [Ciple Framework](#) as its back-end technology which the entire project is going to publish for iOS, Android, VR (Meta Quest), Windows, macOS, Linux, Playstation & Xbox.

## Expertises
